RELATED EXPERIENCE

Peer Mentor

Sept. 2020 - present

For EECS1012 - Introduction to Computing: a Net-centric Approach

- Held meetings twice a week with a group of 5 to 10 students to expand their computational thinking skills.
- Guided students through the problem solving process of many questions.
- Developed weekly reports on each student and their progress, and of weekly activities.

Freelance Developer

June 2020 - Sept. 2020

Ivory Bohemian Art - Online store for a jewelry brand 🌐 Website 🐙 Github

- Developed an ecommerce platform that meets the client needs.
- Ensured a simple user experience and a nice interface to increase conversion rate.
- Implemented different user roles in which admins have permissions to create and delete products to ensure flexibility and great user experience for the admins.
- Implemented an admin panel that allows the root user to keep track of orders and manage admins.
- Implemented serverless functions to reduce running cost and development time.

Freelance Developer

Apr. 2020 - June 2020

Archery Hub - Website for an archery academy 🌐 Website 🐙 Github

- Designed and developed the website ensuring a great user experience.
- Implemented the booking functionality which allows users to book different time slots in different locations; a confirmation email is then sent and the event is added to Google Calendar for both the user and the admin.
- Implemented an admin panel that can be used to set available time slots for each location.
